

# Testing

Sheet 27

## Testing:

Test your final product; does it do everything it is meant to do? Does your POS unit work, are your fonts easy to read, etc. Explain how your product met the points on your specification. Include:

- o Scores out of 10 for each product you made and say why you gave it that score.
- o Does your material work well, if not what other materials could you have used?
- o Include photographs or drawn images.
- o Evaluate its function does it work well.
- o Evaluate its cost of production compared to how much you would sell it for?
- o Evaluate its size, does it need to be smaller, bigger, font sizes, etc.
- o Evaluate its style and aesthetics did it need more stylised pieces and graphics?
- o Evaluate its intended user market does it appeal to the users you designed it for?
- o Evaluate your changes, did you make the right changes during making or could you have done something differently?
- o Include other points from your specification and state if your products met the specification.
- o Include an evaluation summary explaining how you met the specification.

More info: See your revision guide page 37 and 38.
