

What to include:

Materials research (Secondary research 2): This sheet will contain brief materials research. What materials will you use to make your product? What materials are used in industry? On this sheet you should consider:

More info: See your revision guide (Paper and Board page 40, Timber page 42, Metals page 45, Plastics page 48)

- o What materials would you make your products from?
- o State materials and the materials properties for each piece of your project.
- o How will you cut and join your materials?
- o What tools will you use?
- o What finishes could you use?
- o Environmental issues.
- o Include images of materials to add interest.

Note: The BBC Bite size website has a lot of useful info as do the textbooks we have!
