MANUFACTURING CHECK LIST

Is the circuit safe to use?	
Is the circuit complete?	
Does the circuit work?	
Is the circuit board secure in the package?	
Can the circuit board be easily removed for inspection?	
Is the battery secure in the package?	
Is there easy access to the battery?	
Are all the wires and connections tidy?	
Are all flying leads and battery connections anchored to the circuit board?	
Are all connections to switches and output devices sleeved and insulated?	
Is the quality of the soldering to an acceptable standard?	
Is the circuit complex to make?	
Is the appearance of the circuit attractive?	
Has the final spray paint finish been applied?	
Have the self adhesive lettering been applied to the case?	
Does the product meet the specification?	
Does the circuit & Battery fit easily into its packaging?	
Does the product do the job it's meant to?	
Does the product meet all safety standards?	
Does the product meet all construction standards?	
Will the product ensure customer satisfaction?
