

GCSE Graphic analysis of manufacture

Analysis of manufacture: This sheet will contain the findings from your research as a spider diagram summary sheet. Here you will map out all manufacturing research findings including how you will make your product and how it would be made in industry. You may get this onto half a sheet or you may leave this out if your materials sheet is detailed enough. On this sheet you should consider:

- **Workshop manufacturing techniques**
 - State how you will you make this product.
 - State what tools and processes you could use.
- **Industry manufacturing techniques**
 - State how your products will be made in industry.
 - State what mass manufacturing techniques and processes could be used.
 - State what processes techniques could you use.
- **Materials**
 - State what materials will you use, Foam board, balsa, HIPS, card, etc.
 - State the material problems and hazards, tools, joining issues.
- **Environmental issues.**
- **Page number, title and your name.**
